

VEHICLE CARE *Solutions*

- Provides long-term protection, effective for up to 6 months
- Leaves a purple visible protective coating
- Prolongs life of battery and related components
- Great rust preventer on metal surfaces

CARE FOR WORK ENVIRONMENTS®

REDUCES POWER LOSS

Corrosive build-up often drains power from batteries. CAP cleans the corrosion from terminals, battery posts and casings, extending battery life with regular use.

PROTECTS AGAINST CORROSION

CAP puts a residual coating over the cleaned terminals, battery and cables. The CAP barrier guards against future corrosion, especially on the positive terminal where the white powdery buildup tends to start.

SAVES TIME AND LABOR

CAP aerosol provides both cleaning power and protective coating, reducing service and timely battery replacement. Users can see CAP protection long after the service work has been performed.

APPLICATIONS

- Lift truck batteries
- Car and truck batteries
- Golf cart batteries
- Storage batteries
- Battery cables
- Battery hold-downs

DIRECTIONS FOR USE:

1. Shake well before using. Disassemble battery components.
2. Protect against overspray by covering adjacent fender.
3. Spray CAP on battery, terminals and cables.
4. Allow product to work for two to three minutes. If battery acid is present, the product will begin to turn red.
5. Wipe with clean, damp cloth.
6. Reassemble battery components.
7. Wait 5 minutes before starting the engine.

TECHNICAL DATA:

- APPEARANCE:** aerosol spray
ODOR: petroleum odor
COLOR: yellow, but turns red in the presence of acid.
FLAMMABILITY: extremely flammable aerosol
STABILITY: minimum one year
COLD STABILITY: 32 °F (0 °C)
PROPELLANT: hydrocarbon
pH: 10.8

Please review label and SDS for all product directions, precautions and first aid information.
